

# Lab: Make Your Own Routes

3 min to complete · By Brandon Gigous

Alright Flask cadet, it's time for your first mission. If you choose to accept, your mission is to define three routes in your Flask application.

## Learn by Doing

1. The first route shall be for an "about" page that was shown in the last lesson. For this lab, write a blurb about either: (a) what you hope to get out of this course, or (b) a mini bio of yourself.
2. The second route shall be for a page that lists your favorite songs. Use some HTML to make it look somewhat pretty! Try using some `<li>` , `<strong>` , or `<em>` tags and a sprinkle of header tags like `<h2>` and `<h3>` to add some excitement.
3. The third route shall be for a page that has a link to the two other pages set forth above.

If you haven't already, now's a good time to make your first `git commit` !
